Change Information No change issue detected.

1 Soup menu

Requirement Type Functional

ID SN-GS-001

Description

Kitchen shall produce a menu of distinct soup varieties selectable by operators.

Rationale

Customers expect variety across the menu.

Revision Information

SID	1	Revision	1
Created by	sarah	Created on	05-Jul-2026 12:23:22
Modified by	sarah	Modified on	05-Jul-2026 12:23:22

Change Information No change issue detected.

2 Small crew

Requirement Type Functional

ID SN-GS-002

Description

Kitchen shall be operable by the small crew of beings on site.

Rationale

Only 5 beings staff the facility.

Revision Information

SID	2	Revision	1
Created by	sarah	Created on	05-Jul-2026 12:23:22

3 Galactic shipping

Requirement Type Functional

ID SN-GS-003

Description

Kitchen shall dispatch finished soup to customers across the galaxy.

Rationale

Customers are distributed across many worlds.

Revision Information

SID	3	Revision	1
Created by	sarah	Created on	05-Jul-2026 12:23:22

4 Food safety

Requirement Type Functional

ID SN-GS-004

Description

Kitchen shall deliver safe, uncontaminated soup at correct serving temperature.

Rationale

Safety and quality are non-negotiable.

Revision Information

SID	4	Revision	1
Created by	sarah	Created on	05-Jul-2026 12:23:22
Modified by	sarah	Modified on	05-Jul-2026 12:23:22

5 Transit-durable packaging

Requirement Type Functional

ID SN-GS-005

Description

Packaging shall keep soup intact during long-distance interstellar transit.

Rationale

Shipments take weeks to reach far customers.

Revision Information

SID	5	Revision	1
Created by	sarah	Created on	05-Jul-2026 12:23:22

1	0	0	0	0	1

6 Inventory tracking

Requirement Type Functional

ID SN-GS-006

Description

Kitchen shall track ingredient stock so the crew knows what to reorder.

Rationale

Stock-outs halt production; crew needs visibility.

Revision Information

SID	6	Revision	1

7 Facility budgets

Requirement Type Functional

ID SN-GS-007

Description

Kitchen shall fit within facility mass, volume, power, and cost budgets.

Rationale

Deployment site imposes hard resource limits.

Revision Information

SID	7	Revision	1
Created by	sarah	Created on	05-Jul-2026 12:23:22

1	0	0	0	0	1

8 Gravity range

Requirement Type Functional

ID SN-GS-008

Description

Kitchen shall operate across the range of gravitational environments where customer worlds are located.

Rationale

Facility may be deployed on any of a diverse set of worlds.

Revision Information

SID	8	Revision	1
Created by	sarah	Created on	05-Jul-2026 12:23:22

9 Delivery fleet support

Requirement Type Functional

ID SN-GS-009

Description

Kitchen shall operate and include a fleet of delivery rockets for transporting finished soup to customers and receiving inbound deliveries.

Rationale

Dedicated infrastructure required for frequent launch, landing, loading, and refueling operations.

Revision Information

SID	9	Revision	1
Created by	sarah	Created on	05-Jul-2026 12:23:22
Modified by	sarah	Modified on	05-Jul-2026 12:23:22

10 Ingredient Storage

Requirement Type Functional

ID SN-GS-010

Description

Kitchen shall store a variety of delivered ingredients under appropriate temperature and handling conditions.

Rationale

Need safe, flexible storage of both perishable and shelf-stable ingredients.

Revision Information

SID	10	Revision	1
Created by	sarah	Created on	05-Jul-2026 12:23:22

11 Cooking infrastructure

Requirement Type Functional

ID SN-GS-011

Description

Kitchen shall include cooking infrastructure capable of producing soup at required production rates.

Rationale

Throughput targets cannot be met without sufficient cooking capacity matched to demand.

Revision Information

SID	11	Revision	1
Created by	sarah	Created on	05-Jul-2026 12:23:22

12 Internal material transport

Requirement Type Functional

ID SN-GS-012

Description

Kitchen shall transport ingredients and products internally between receiving, storage, cooking, packaging, and delivery areas.

Rationale

Required to meet throughput targets.

Revision Information

SID	12	Revision	1
Created by	sarah	Created on	05-Jul-2026 12:23:22

1	0	0	0	0	1

13 Operational lifecycle

Requirement Type Functional

ID SN-GS-013

Description

Kitchen shall support startup, steady operation, and shutdown across its deployment lifecycle.

Rationale

System must operate safely outside of nominal steady-state conditions.

Revision Information

SID	13	Revision	1
Created by	sarah	Created on	05-Jul-2026 12:23:22

1	0	0	0	0	1

14 Fault tolerance

Requirement Type Functional

ID SN-GS-014

Description

Kitchen shall continue operating or degrade safely in the presence of faults.

Rationale

Production continuity and safety must be maintained with minimal crew intervention.

Revision Information

SID	14	Revision	1
Created by	sarah	Created on	05-Jul-2026 12:23:22

1	0	0	0	0	1

15 System coordination

Requirement Type Functional

ID SN-GS-015

Description

Kitchen shall coordinate cooking, packaging, storage, and transport activities to meet operational goals.

Rationale

High automation requires integrated system-level control.

Revision Information

SID	15	Revision	1
Created by	sarah	Created on	05-Jul-2026 12:23:22

1 Recipe count

Requirement Type Functional

ID SR-GS-001

Description

System shall cook at least 8 distinct recipes selectable at runtime.

Rationale

Eight recipes gives menu variety while staying within ingredient storage and recipe-validation budgets.

Revision Information

SID	1	Revision	1
Created by	sarah	Created on	05-Jul-2026 12:23:23

1	1	0	0	0	0

2 Throughput

Requirement Type Functional

ID SR-GS-002

Description

System shall sustain total throughput of at least 200 bowls/hour.

Rationale

200 bowls/hour matches expected peak order rate aggregated across customer worlds.

Revision Information

SID	2	Revision	1

1	1	0	0	0	0

3 Automation level

Requirement Type Functional

ID SR-GS-003

Description

System shall achieve average automation level of at least 0.8 across components.

Rationale

0.8 automation lets the 5-operator crew cover a 24/7 facility with rotation and breaks.

Revision Information

1	0	0	0	0	1

4 Operator count

Requirement Type Functional

ID SR-GS-004

Description

System shall require at most 5 concurrent operators at peak load.

Rationale

Facility berthing and life support are sized for a 5-person crew.

Revision Information

SID	4	Revision	1

5 Shipping manifest

Requirement Type Functional

ID SR-GS-005

Description

System shall generate a shipping manifest per batch including destination.

Rationale

Manifest is required for customs, transport routing, and recipient confirmation on delivery.

Revision Information

SID	5	Revision	1
------------	---	-----------------	---

6 Transport loading time

Requirement Type Functional

ID SR-GS-006

Description

System shall load packaged soup onto transport within 10 minutes of packaging.

Rationale

10-minute window keeps loading pipeline aligned with the 200 bowls/hour production rate.

Revision Information

SID	6	Revision	1
Created by	sarah	Created on	05-Jul-2026 12:23:23

1	1	0	0	0	0

7 Contamination detection**Requirement Type** Functional**ID** SR-GS-007**Description**

System shall detect contamination before sealing with at least 99% sensitivity.

Rationale

99% sensitivity balances false-positive rework cost against the downstream cost of a contaminated shipment.

Revision Information

SID	7	Revision	1
Created by	sarah	Created on	05-Jul-2026 12:23:23

1	1	0	0	0	0

8 Serving temperature

Requirement Type Functional

ID SR-GS-008

Description

System shall verify soup temperature in 70-95 C before QC sign-off.

Rationale

70-95 C is the safe serving range: above pathogen-kill threshold and below scald risk.

Revision Information

1	0	0	0	0	1

10 Inventory accuracy

Requirement Type Functional

ID SR-GS-010

Description

System shall track ingredient inventory with at most 1% stock error.

Rationale

1% stock error keeps reorder decisions accurate enough to avoid production-halting stock-outs.

Revision Information

SID	10	Revision	1

11 Mass budget

Requirement Type Functional

ID SR-GS-011

Description

Total system mass shall not exceed 15000 kg. Stored consumables (ingredients and packaged product) are excluded from this budget (requirements decision 2026-07-08, ADR-032: resolves the SR-GS-021 storage-endurance conflict).

Rationale

Allocated from the facility deployment mass budget.

15 Gravity operating range

Requirement Type Functional

ID SR-GS-015

Description

System shall perform all cooking, packaging, and shipping functions nominally across ambient gravity 0.1 g to 12 g.

Rationale

0.1-12 g spans the full ambient gravity range across candidate customer worlds.

Revision Information

SID	15	Revision	1

16 Structural 12 g tolerance

Requirement Type Functional

ID SR-GS-016

Description

System structure and mounts shall withstand sustained 12 g loading without permanent deformation.

Rationale

12 g is the worst-case sustained ambient gravity among customer worlds.

17 Concurrent rocket support

Requirement Type Functional

ID SR-GS-017

Description

System shall support simultaneous handling of at least 3 delivery rockets for loading or unloading.

Rationale

Parallel handling prevents outbound shipping from blocking inbound ingredient deliveries.

20 Temperature-controlled storage

Requirement Type Functional

ID SR-GS-020

Description

System shall provide separate storage zones for cold and room-temperature ingredients.

Rationale

Different ingredient classes require different storage conditions to maintain safety and quality.

Revision Information

SID	20	Revision	1

21 Ingredient storage capacity

Requirement Type Functional

ID SR-GS-021

Description

System shall store at least 72 hours of ingredients at nominal production rate.

Rationale

72 hours of buffer mitigates delivery delays without exceeding storage mass and volume budgets.

28 Preparation zone

Requirement Type Functional

ID SR-GS-028

Description

System shall include a separate ingredient preparation zone supporting chopping and weighing of ingredients, physically isolated from storage and cooking zones. The zone shall sustain prep throughput of at least 200 bowls/hour equivalent.

Rationale

A dedicated prep zone keeps raw/prepped materials separated and sized so it does not bottleneck the cooking line.
